

JOAER

The image of "Joer" is taken from the Chinese character "Heng", which symbolizes the eternal Sun and the Moon that have existed since ancient times.

It is with simple but exquisite appearance, like a sculpture full of ancient flavors. The outer appearance is a combination of spraying and metal plating, creating a feeling of profound also light luxury.

The interaction between people and the zoom lens offers light the ability to be changeable. The unique zoom function adapts to multiple lighting situations. With a bigger beam angle, the lighting is soft and comfortable; with a smaller beam angle, the light is focused and accent.
